

# Directions for use

Styling a sofa goes beyond just cushions and throws. Here are some ways to make your sofa look its best:

**Throws:** Adding a throw or blanket is an easy way to dress up your sofa. Choose lightweight, patterned throws for spring/summer, and chunky wool throws for autumn/winter. Drape it over the arms or seat cushions for a cozy feel.

**Cushions:** Layering different cushions can transform your sofa. Mix textures and fabrics for interest. Cluster patterned cushions together or place one on each sofa cushion with color block pillows in between

**Folded Arm:** For a tidy yet casual look, fold the throw lengthwise and drape it over the arm of the couch. Keep the decorative edge down the side of the sofa

**Waterfall:** Fold the throw into thirds and drape it over the back, down the front of the back cushion, and onto the seat. Add a throw pillow in the front if desired

**Back and Beyond:** If the back of your couch faces the entrance, fold the throw widthwise and center it on the sofa. Let it hang down the back almost to the bottom

Remember to find the perfect balance between accessories and clutter, and consider the surrounding area when styling your sofa!
